## Notice

UNITED STATES OF AMERICA FEDERAL POWER COMMISSION Southside Electric Cooperative) Project No. 2749 - NOTICE OF APPLICATION OF PRELIMINARY PERMIT UNCONSTRUCTED PROJECT (April 3, 1975) - Public notice is hereby given that application for preliminary permit has been filed under the Federal Power Act (16 U.S.C. 791a-825r) by Southside Electric Cooperative of Crewe, Virginia (Correspondence to: Mr. Lynwood H. Wilson, Wilson and Boswell, Attorneys,P.O. Box 45,Crewe, Virginia 23930) for proposed Project No. 2749, to be known as the Randolph Project, (Virginia) in the counties of Charlotte, Halifax, Pittsylvania, Campbell, Bedford, and Appomattox, Virginia. The proposed project would operate as a pumped storage complex involving up to 13 dams and reservoirs. According to the application, the proposed Randolph Pumped Storage Project would consist of: (1) a dam creating a reservoir on the Roanoke River about 3 miles upstream from Randolph, Virginia; (2) several other developments including dams and generating stations on Hunting Creek, Wallace Creek, Cub Creek, Turnip Creek, Roanoke Creek, Falling River (with Seneca-Molly's Creek), Otter River; and (3) the Melrose (at Melrose, Virginia), Seneca (6 miles west of Melrose, Virginia), and Taber (9 miles west of Melrose, Virginia) sites on the Roanoke River. The application proposes several schemes of development, one of which would be: (1) The Randolph reservoir would have a normal water level (NWL) of 380 feet and tailwater water level (TWL) of 302 feet discharging into the existing Army Corps of Engineers J. H. Kerr Reservoir, (2) Roanoke Creek and Hunting Creek reservoirs would have NWL's of 410 feet and 436 feet and TWL's of 302 feet discharging into the Kerr Reservoir; (3) Wallace Creek, Cub Creek, Turnip Creek, and Falling River would have NWL's of 426 feet, 440 feet, 514 feet, and 510 feet with TWL's of 380 feet discharging into Randolph Reservoir; (4) Seneca and Molly's Creek would have NWL's of 650 feet and TWL's of 510 feet discharging into Falling River reservoir; (5) The Seneca - Taber development would have a NWL of 485 feet and TWL of 468 feet; (6) The Melrose reservoir would have a NWL of 468 feet and TWL of 420 feet. All of the hydro-electric turbines would be reversible and would pump water to their respective upper reservoirs during off-peak load conditions. Future development on the Cub Creek reservoir would include a 3,200 MW stream electric generating plant. Preliminary studies of applicant indicate an ultimate installed hydroelectric capacity of 3,375 MW at a cost of $1,700,000,000 (excluding Seneca-Taber and Melrose developments) to be constructed over a 16-year period. Alternative plans of development would retain the basic multiple reservoir pumped storage concept but with certain upper reservoirs discharging into different lower reservoirs and with corresponding changes in NWL and TWL. The size, number, and type of units would be determined under studies to be conducted under the preliminary permit. The applicant proposes to market the power to its own customers, associated Electric Cooperatives, and municipally-owned electric utility systems in Virginia, North Carolina, and surrounding States. The applicant also proposes to exchange peaking power on off-peak and dump power with VEPCO and Appalachian Power Company. Any person desiring to be heard or to make any protest with reference to said application should on or before June 9, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR §1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection. Kenneth F. Plumb, Secretary. 4-17-4t

## In Memorium

In loving memory of our husband and father, Will B. Booker, who died April 18, 1974.
Friends came in to comfort,
Bought flowers by the score,
Did many things to comfort,
Till they could do no more.
We shall start another
Long and lonesome mile.
Thinking of you so often,
Hungry to see you smile.

We're trying to carry on,
As you would have us do.
Hoping to have you clasp our hand.
When our work on earth is through.

GOLDEN TOUCH OF HOSPITALITY
... from Best Foods Kitchens

**Cranberry Pie Is Old Favorite**

The cranberry is a native American fruit. Early English settlers called it the "fen" or swamp berry. Later, the Dutch dubbed it "kranebere" from which, of course, came its present name.

Cranberry pie is one of the delicious desserts that can be made from this tart berry. The recipe given here is a shortcut variation of an old New England favorite. It uses whole berry cranberry sauce rather than the fresh berries so it can be made at any season of the year as well as at holiday time.

**Cranberry-Raisin Pie**
1 recipe double crust pastry
2 cans (1 pound each) whole berry cranberry sauce
½ cup raisins
2 tablespoons sugar
2 tablespoons Argo corn starch
¼ teaspoon salt
½ teaspoon cinnamon
1 teaspoon grated lemon rind

Line a 9-inch pie pan with ½ the pastry. Mix together cranberry sauce, raisins, sugar, corn starch, salt, cinnamon and grated lemon rind. Turn into pastry; lined pie pan. Roll out remaining pastry for top crust. Make several slits in crust to permit escape of steam. Place crust over cranberry mixture; seal and flute edges. Bake in 450° F oven 25 to 35 minutes.
